Frontend Developer

Passionate Frontend Developer with one year of internship experience in creating visually appealing and accessible web applications. Proficient in frontend development with a strong focus on React JS, I am Skilled in delivering scalable solutions that prioritize high availability and user experience. Committed to continuous learning and eager to embrace new challenges in a collaborative environment.

Core Competencies

Web Development HTML, CSS, SCSS, Bootstrap, Tailwind, JavaScript, React JS, MaterialUI, Angular JS, TypeScript

Backend Development Express JS, Node JS, MongoDB

Tools & Platforms Git, Vitest, Jest, Netlify, Render, Vercel

Interpersonal Skills Management skills, Creativity, Team work, Problem solving, Communication, Self Learning

Projects

Time Logger Application

- Efficient tracking tool for employee hours and productivity, with robust admin controls for real-time project monitoring.
- Implemented real-time admin controls, reducing task assignment time by 30% and improving overall team productivity.
- Optimized the user interface using React and SCSS, resulting in a 25% faster task allocation process and a more seamless user experience for administrators and employees.
- Tech Stack : React | Redux | SCSS | Bootstrap | React-image-Crop | React-file-Resizer | React-Quill | Lazy | Express | Node | MongoDB | JWT

PixelBoho, ALSI Logistics, [Link](#)

- Executed real-time admin controls, reducing task assignment time by 30% and improving overall team productivity.
- reducing manual data management efforts by 40% and improving operational efficiency
- Tech Stack : React | Vite | Tailwind | JWT | axios | SCSS | React-Quill | python django | MySQL

Expense Tracker

- Built a CRUD interface for transactions with React and Bootstrap, decreasing user interaction time by 30% for adding, viewing, editing, or deleting transactions.
- Planned and implemented a transaction analysis feature with React-chartjs, enabling users to visualize yearly spending trends and improve budgeting accuracy
- Developed an admin control panel allowing removal of unwanted users, reducing inactive accounts by 20% and enhancing application security with JWT authentication.
- Tech Stack : React | Redux | Bootstrap | React-chartjs | Express | Node | axios | JWT | MongoDB

Project-Fair

- Built a dynamic interface with React and Context API, streamlining the process of adding, viewing, editing, and deleting projects
- Integrated a scalable backend using Node.js and MongoDB, enabling the application to handle 100+ concurrent users without downtime, ensuring a seamless experience.
- Tech Stack : React | Context API | Bootstrap | axios | JWT | Express | Node | MongoDB

Tasty Palette

- Created a seamless interface with React-router-dom and Bootstrap, enabling users to add, edit, delete and navigate through recipe content
- Integrated video playback functionality for recipes, leading to a 25% improvement in user retention by providing an interactive cooking experience.
- Applied comment management features, allowing users to add and update comments
- Tech Stack : React | React-router-dom | Bootstrap | Json server | axios | React toastify |

BMI Calculator

- This simple BMI calculator will show BMI value using weight in Kg and height in meter.
- Tech Stack : Javascript | JSregex | React | MaterialUI | HTML & CSS

Weather App

- It is a weather website where you can get real time weather details like temperature, humidity, pressure, timezone, country and date for any city.
- Tech Stack : Javascript | fetch API call | Bootstrap | HTML & CSS

Travel Time Holidays

- Designed a fully responsive interface with HTML, CSS, and Bootstrap, ensuring compatibility across 100% of devices, including mobile, tablet, and desktop.
- Enforced lightweight static web design techniques, reducing page load time by 30%, resulting in a smoother browsing experience for users.
- Tech Stack : HTML | CSS | Bootstrap |

Professional Experience

PixelBoho, India Feb 2024 - Aug 2024

Frontend Developer Intern, Ernakulam

- Helps to made deep knowledge in versioning tool. Collaborated with backend teams to integrate RESTful APIs, ensuring seamless communication between frontend and server-side logic.
- Integrated third-party libraries like Quill editor to projects, customizing components to meet specific project requirements.
- Optimized dashboard functionality for a logistics application, reducing admin workflow time by 30%.
- Improved page load time by 25%, ensuring seamless data management through API integration.
- Contributed to two major projects, ALSI Logistics and IMODA, delivering high-quality, scalable features.

Luminar Technolab, India Jul 2023 - Feb 2024

MEARN Stack Developer Intern, Kochi

- Spearheaded the development of responsive web pages, translating mockups into functional designs using HTML, CSS, CSS frameworks.
- Implemented Redux Toolkit for efficient state management, boosting development speed by 20% and streamlining complex application workflows.
- Acquired expertise in building and deploying end-to-end MEARN stack projects, combining front-end and back-end technologies to deliver complete solutions.
- Gained hands-on experience with deployment tools like Netlify and Vercel, ensuring seamless project launches and scalability.

Education

Entri Learning App, MEARN Stack in Web Development

Mar Athanasius College Kothamangalam, Kothamangalam, India, BSc in Botany, (GPA: 9.1 CGPA), Jan 2019 - Dec 2022

G.H.S.S Korom, Payyannur, Payyanur, India, HigherSecondary in , (GPA: 91 %), Jan 2017 - Dec 2019

Certifications

FullStack Web Development, Entri Elevate Feb 2023

MEARN Stack Development, Luminar Technolab, kochi Feb 2024

NACTET Feb 2024

React JS Developer Internship, PixelBoho Aug 2024
